### Solium Capital Inc. Ranked Among Deloitte Technology Fast 50 for a Second Year

**CALGARY, ALBERTA--(Marketwire - Sept. 25, 2007)** - For the second consecutive year, Solium Capital Inc. (TSX:SUM) ("Solium") has been ranked among the prestigious Deloitte Technology Fast 50, a ranking of the 50 fastest-growing technology companies in Canada, based on the percentage of revenue growth over five years. Solium ranked 17th in the 2007 Deloitte Technology Fast 50, marking the second straight year in which it has been ranked among the top 20.

Solium's growth of 1,249% from 2002 to 2006 is largely attributed to the evolution of its industry-leading and innovative proprietary software, Shareworks™, a web-based application for integrated and automated equity incentive and stock plan management. Solium continues to emerge as a dominant provider in the employee stock administration industry in Canada and has experienced early success with expansion into the US market.

"We are elated to be recognized by Deloitte for a second consecutive year. Our inclusion in this select group of fast-growing technology companies in Canada is a testament to the continually evolving value proposition we offer our marketplace and further reinforces our position as a technology leader in our industry," said Jeff English, CEO of Solium Capital Inc.

"Deloitte created the Deloitte Technology Fast 50 program a decade ago to celebrate the world-class achievements of Canadian technology companies," said John Ruffolo, National Leader, Technology, Media & Telecommunications Industry Group, Deloitte. "Companies like Solium Capital are a perfect example of the combination of revenue growth, technological innovation and entrepreneurial spirit that continues to be a winning formula in the technology sector."

Now Canada's pre-eminent technology award program, the Deloitte Technology Fast 50 augments the broader Deloitte North American Technology Fast 500 initiative, with winners automatically eligible for this elite ranking.
